1. The service life in the vertical use may vary depending on the load capacity. Please refer to the "Service Life Table." 2. The maximum velocities may vary depending on the load capacity. Please refer to the "Velocity - Maximum Load Capacity Table."

Note 1. Load can be applied only in axial direction. Please use externally mounted guides together to avoid application of radial loads on the rods.
 Note 2. Orientation of the wrench flats is not fixed in relation to the base surface.
 Note 3. In order to ensure running straightness, use externally mounted linear guides.
 Note 4. Reversed Motor Side Home cannot be set in case of Lead 2mm specifications.
 Note 5. The cable should be fastened without excessive strains.
 Note 6. The M4 hex-socket head screw can be utilized to fasten the cable (effective screw depth is 5mm).
 Note 7. The minimum bending radius of the cable is 30mm.
 Note 8. The brake adds 0.2 kg to the masses.
 Note 9. Indicates the distance to the mechanical stopper.

Note

Power interruption circuit is not provided in this controller in order to provide maximum flexibility for customer specific safety scheme. Please be sure to provide an external power interruption circuit and form an emergency stop circuit. For Circuit examples see P.109.

FAQ

- Q1. The actuator does not move.
A1. When activating an actuator using Support Software or Handset Terminal, invalidate Option Parameter (No. 80). (Option Valid = I/O Terminal Valid, Option Invalid = I/O Terminal Invalid). Then turn the servo status "ON" and operate the homing procedure. After the completion of homing, start the operation by turning on "Operation".
- Q2. LED light is on. Is there a controller defect?
A2. Blue: PWR (OFF: Control Power Shutdown, Blink: Servo OFF, ON: Servo ON), Red: ERR (OFF: Control Power Shutdown / No Error Alarm, Blink: Error Alarm On (External Factor), ON: Error Alarm On (Internal Factor))
- Q3. Teaching cannot be conducted by via I/O.
A3. To conduct teaching via I/O, the status needs to be ON for MANUAL Input and OFF for Interlock Input. Note that it does not function in the state of "Homing Incomplete".
- Q4. Is low-speed operation possible?
A4. Possible, however, 10 to 20% of max. velocity is the limit depending on the lead.

For optional items, see P.113. It is more economical to order the optional items as alterations than purchasing them individually. Entering point data requires the handy terminal or the support software. An I/O Cable is required for Parallel Communication I/O Control. For details on daisy-chain, see P.111, 113. Please select the correct I/O cable type for the appropriate controller type.
