Open-Top Tanks

Overview

Features

- Open-top Tanks are suitable for storage or mixing of liquids (powders). Selectable from a wide capacity range from 2.0 to 45.8.£
- By specifying I.D. and desired depth, depth is automatically determined (refer to "How to Specify Tank Capacity" below).
- Selectable between 3 outlet shapes in 2 places (see "Shapes of Liquid Outlets" below for details) and 2 types of lids, according to the application. • Position of Tanks can be adjustable by specifying the weld height of feet in 10mm increment.

■ Product Overview

- 1) Effective Capacity: 2.0 ~ 45.8 £
- 2 Material: SUS304

Acetic Anhydride

Acetic Anhydride (Boiled)

• ③ Finish: Buffing on inner and outer surface polishing grade #320 (* Note) (* Note) Buff Polish Grade: (a) #240: Coarse Buff Polish. High level of brightness or luster is not provided. (b) #320: Standard Buff Polish. Our product is provided with this type of polish.

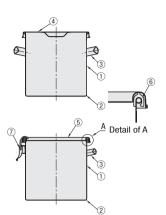

Ferric Chloride

■Condition of Use

- ① Operating Pressure (Atmospheric Pressure) ② SUS304 Chemical Resistance (See the following Table 1 for details)
- 3 Gaskets for Sealing Lid (For physical properties and chemical resistance, see P.391) (See Table 2 below for oil and solvent resistance) Confirm (1)~(3) above before use.

SUS304

The information in < Table 1> and < Table 2> above is reference data and to be used only as a guide. Values may differ depending on operational conditions or operating environment.

- · Use under atmospheric pressure. Never use for compressing.
- Never use as a container to generate vapor by steaming, heating or as a result of chemical reaction.
