M Material Body : S45C
Protective Plate : Brass

■ Features

- A brass protective plate helps to prevent scratches / damages on the screw head.
- Managing torque helps to prevent damage due to excessive tightening and reduce malfunction.

Applicable screw outer dia.	Maximum tightening torque (N·m)	Part Number	Unit Price
0~30	70	M-SHA-S	Quotation
30~50	160	M-SHA-M	

⚠ Follow the standards set by the injection molding machine manufacturer when tightening the torque. During tightening, ensure the wrench does not slip out of alignment.
